- Javascript
- React.js
- Node.js
- Restful api
- MongoDB
- Problem-Solving
- Analytical and Critical Thinking
- AWS cloud
- Git version control

WORK HISTORY

November 2024 - January 2025

Self Employed - Freelancer, Bengaluru (Remote)

- **APK Analysis API:** Developed a scalable API using AWS Lambda, API Gateway, and SQS for asynchronous APK file analysis with Androguard and Python. Integrated callback URL mechanisms for result delivery and monitored performance via AWS CloudWatch.
- **Bank/NBFC Identifier:** Built and deployed a Python-based web scraping tool using BeautifulSoup on AWS EC2 with Docker to classify URLs as banks or NBFCs.
- **MCC Code Analysis API:** Designed and implemented an API leveraging AWS Lambda, API Gateway, and Gemini API to identify MCC codes. Utilized callback mechanisms for asynchronous processing.

December 2023 - November 2024

Infocampus - MERN Stack Course, Bengaluru

- **Food Delivery App:** Developed a full-stack app using MongoDB, Express.js, Node.js, and React. Implemented JWT-based authentication, cart features, and order history with RESTful APIs.
- **State Management:** Used Context API for global state handling across components.
- **Image Management:** Integrated Cloudinary for image uploads, including profile updates.
- **Backend Efficiency:** Leveraged Express.js middleware for request validation and MongoDB for optimized data management.

May 2022 - September 2023

Saranyu Technologies - Software Engineer, Bangalore

- **Saranyu Instaplay Media Player:** Enhanced media player with features like "Skip Intro" and "Watch Next Episode" for improved user engagement. Integrated Google IMA SDK for ad monetization and resolved critical live environment bugs to ensure seamless playback across web and TV OTT platforms.
- **ETV Win TV App (Roku):** Developed a user-friendly front end using SceneGraph and BrightScript. Optimized performance for faster loading and device compatibility, collaborating with teams to troubleshoot real-time issues for timely delivery.

December 2020 - July 2021

ITTStar - Data Engineer Intern, Bangalore

- **AWS Cloud Fundamentals:** Acquired a solid understanding of AWS cloud infrastructure, including services like Amazon S3, lambda and IAM, enabling efficient cloud storage and access management.
- **Project Involvement:** Designed and implemented a solution to upload and manage images in an Amazon S3 bucket using Python, ensuring secure and efficient handling of data
